

Who we are

Meo Carbon Solutions is an independent consulting company with longstanding experience in sustainability. We are active in Europe, South East Asia, Africa, and the Americas and we manage projects for public and private sector clients. Our projects regularly involve the participation of stakeholders from industry, agriculture, NGOs, research institutions and public authorities.

What we do

MCS helps companies, institutions, operators and their supply chains to become more sustainable, transparent, competitive and future oriented. We support our clients on the way to reach their targets in the framework of the global Sustainable Development Goals.

Our services cover entire supply chains from farm to final market including all types of feedstocks, processing units and final products.

MCS provides individual solutions for various sectors in order to **improve carbon footprints**, **increase sustainability** and **empower smallholders**, in all supply chain.

Mission & Vision

“We strive to support customers with developing customized sustainable supply chains embedded in the SDGs.”

“We believe sustainability to be the future – MCS contributes by going ahead of the crowd with integrated carbon neutral solutions.”

Benefits for our clients

MCS offers you **in depth practical experience** with the analysis, implementation and monitoring of market trends, governmental regulations, international standards and certification systems.

We provide you **individual solutions for your requests** precisely tailored to your requirements and needs. You can benefit from our **network of international and interdisciplinary partners** and a comprehensive advice and support from a dedicated source.

Understand the impact, implement solutions, monitor performance – together with MCS!

Core Competencies
